

Instructions for Redeeming a United Plugins License Purchased on WAProduction.com

1. After purchasing your license, visit your W. A. Production account page [here](#).
2. In your **My Product Keys** section will be a redemption code for your new plugin. Click **View Product Key** on the plugin you purchased, then copy the code.
3. Next, visit UnitedPlugins.com.
4. If you do not already have a United Plugins account, create one. Otherwise, make sure you are logged in.
5. Once logged in, visit your **My Licenses** page. You can find it in the **Account Menu**.
6. Click **Redeem License Key**.
7. Paste your redemption code into the **Your License Key** field
8. Click the **Submit Key** button.
9. Click **Download License**.
10. For PC Users: Click the **WIN** download link. For Mac Users: Click the **MAC** download link.
11. Once it has finished downloading, open and run the installer.
12. Follow the prompts to install the plugin.
13. Mac Users: If you are using macOS High Sierra or higher, you will need to restart your computer. PC users can skip this step.
14. Open your DAW of choice. Depending on your DAW, you may need to manually scan for new plugins in order for the plugin to appear.
15. Load your new plugin.
16. Click the **Activate** button in the plugin window. *Windows 7 Users: while Windows 7 is not officially supported, you should be able to activate the plugin by holding control while clicking the activation button.*
17. Navigate to the folder containing your previously downloaded license file.
18. Select the license file.
19. After confirming your information, you will then be asked to close and reopen your DAW.
20. Close your DAW, then reopen it.
21. Load your plugin – it will now be activated and ready for use.
